PROFESSIONAL SUMMARY

Automation Specialist focused on building AI-powered business systems that reduce manual work and improve business operations. Experienced in designing workflow automations using n8n, Zapier, Make.com, GoHighLevel, OpenAI, and HubSpot, with hands-on experience integrating REST APIs, webhooks, and custom business logic. Background in executive operations provides a practical understanding of how businesses work, enabling automations that solve real operational problems. Every project in the portfolio includes a GitHub repository and a Loom walkthrough explaining the architecture, implementation, and design decisions.

SELECTED PROJECTS

AI Lead Qualification & Routing System

Tools: Zapier • GoHighLevel • OpenAI • Slack • REST APIs • Webhooks

- Designed a two-stage automation where GPT evaluates open-ended lead responses and returns structured JSON used throughout the workflow.
- Built four routing paths based on qualification outcome, including a human approval step in Slack before high-value leads continue through the sales pipeline.
- Integrated directly with the GoHighLevel API for custom field mapping and implemented idempotency checks to prevent duplicate CRM records.

Maya – AI Receptionist

Tools: n8n • GPT-4o-mini • HubSpot • Google Sheets • Slack

- Built an AI receptionist that answers customer enquiries, captures lead information, and automatically creates or updates HubSpot contacts.
- Logged conversation history to Google Sheets and notified the team in Slack when visitors qualified as leads.
- Separated customer-facing responses from internal workflow logic to keep conversations clean while maintaining structured automation downstream.

Multi-Tenant RAG Knowledge Base

Tools: n8n • Pinecone • OpenAI • Google Drive • Basic Authentication

- Built an automated document ingestion pipeline that retrieves files from Google Drive, chunks content, generates embeddings, and stores them in Pinecone.
- Used Pinecone namespaces to isolate each client's knowledge base while allowing multiple clients to share the same infrastructure securely.
- Protected the internal query portal with Basic Authentication while keeping public and internal knowledge separate.

Client Acquisition & Lead Nurturing System

Tools: GoHighLevel

- Building interconnected workflows that automate lead nurturing based on qualification and engagement.
- Automatically routes leads into hot, warm, and cold follow-up sequences based on business rules.
- Updates CRM records and pipeline stages automatically throughout the customer journey.

AI Lead Qualification System (v1)

Tools: n8n • Typeform • HubSpot • Gmail • OpenAI

- Built the first version of an AI-powered lead qualification workflow before redesigning the architecture in Zapier and GoHighLevel.
- Implemented structured error handling with automated notifications for failed executions.
- Automated CRM updates, internal notifications, and customer communication.

CORE SKILLS

Automation & AI: n8n • Zapier • Make.com • GoHighLevel • OpenAI API • Prompt Engineering • AI Agents • RAG • Pinecone

Integration & Development: REST APIs • Webhooks • JSON • HTTP Requests • HubSpot API • Basic Authentication • Error Handling • Workflow Architecture

Business Systems: HubSpot • Google Workspace • Slack • Notion • Shopify • ClickUp • OpenPhone • Microsoft Teams • Zoom

Business Operations: CRM Management • Lead Qualification • Client Onboarding • Workflow Optimization • Reporting Automation • Executive Support • Client Communication • Process Improvement • Remote Collaboration

EXPERIENCE

AI Automation Specialist (Freelance) 2023 – Present

- Collaborate with clients to understand existing business processes and identify opportunities for automation.
- Design and build AI-powered automation systems using n8n, Zapier, Make.com, GoHighLevel, and OpenAI.
- Integrate third-party platforms using REST APIs, webhooks, and direct API requests to streamline business operations.
- Troubleshoot, optimize, and maintain automation workflows to improve reliability and reduce manual work.
- Produce technical documentation and Loom walkthroughs to support implementation, maintenance, and client handover.

Executive Assistant — BrightReach Marketing Solutions (US) June 2022 – November 2025

- Managed executive calendars, inboxes, meetings, and appointments across multiple time zones.
- Maintained CRM records, coordinated client communication, and supported sales operations.
- Assisted with Shopify store management and day-to-day business operations.
- Coordinated follow-ups between executives, sales teams, and prospective clients.

Social Media Manager — Top Drawer Management (UK) February 2021 – March 2022

- Managed day-to-day social media engagement, audience communication, and content scheduling.
- Monitored engagement metrics and supported audience growth strategies with a fully remote team.

Medical Underwriting Support Assistant — Independent Contractor (US), part-time May 2021 – August 2022

- Reviewed and summarized large medical records for insurance underwriting.
- Produced clear, accurate case summaries under strict confidentiality and turnaround requirements.

EDUCATION

BSc Anatomy — Bingham University

Doctor of Medicine (MD), 2 years completed — Southwestern University PHINMA
